

POSITIONING

WIRE STEEL ROPE

Positioning and anchoring No-cut lanyard with two loops.
Galvanized steel cable core (133 threads) Ø 6mm, double poliestere sheath Ø 12mm.

The innovative double sheath technology avoids the sliding of the sheath over the cable surface. Pressed thimble eyes at the extremities. On request we provide any kind of Kong connector together with the longe.

Recommended for

Professional: Work activities

Scaffolding and trestels, Metal structures, Treeclimbing/arboriculture, Roof and inclined planes
