

ROPE CLAMPS

FUTURA HAND

A revolutionary rope clamp for its extremely tiny dimensions (only 125g) and ergonomic shape. Its small size allows the users hand to sit comfortably inside the device, close to the rope in the same way as you would grabbing the actual rope. Comes with two different sized handles for ergonomic customisation. Available in right and left versions. The best support to ascend a rope with the "ROPE WALKING SYSTEM" (as if climbing a ladder). After testing the system, cavers confirm an excellent performance and a 30%-efficiency's increase during the ascent. Fitted with anti-overturning system of the cam. High quality, made in Italy! Patented.

Recommended for

Sport: Activities

Caving, Mountaineering, Climbing

Professional: Work activities

Sailboats, Rope Access

Professional: Rescue activities

Mountain rescue, Firebrigades and civil protection

Components: Activities

Sailing
